Serial verb constructions in Pame

The definition of serial verbs in Sasha Aikhenvalds abstract is rather uncontroversial in the literature, and it will also be the basis for my talk about serial verbs in Pame. Pame shows both types, asymmetrical and symmetrical constructions, whereby the semantic relation between the fully inflected symmetrical construction type will be specifically be subject of scrutiny. The data will come from 3 female speakers of the Central Pame variety, on Oto-Manguean languages of San Luis Potosí, Mexico.
